their families***

Medical Demobilization

- *Members returning home from mobilization and separating from active duty service are required to complete a Separation Health Physical and Evaluation (SHPE).*
- *The SHPE takes approx. 45 minutes to complete and can be preformed at a VA facility, Military Treatment Facility or DoD contracted service. ECRC will facilitate the SHPE if not previously completed.*
- *Members filing a VA claim must complete the SHPE within 90 of their date of separation from active duty. The SHPE should be completed with a VA when possible.*

Medical Demobilization

Medical delay/Medical Evaluation

Members returning from a mobilization may receive care for their illness or injury at ECRC at the providers discretion. The Case Management department manages the medical care of all members enrolled in the medical delay and evaluation programs. (Medical Delay-stays on current demobilization orders for up to 28 days. Medical Evaluation-orders requested from PERS for an additional 90 days)

Members requiring care beyond 118 days will request orders for treatment at MEDHOLD (RCC Mid Atlantic)

Medical Demobilization

Resource Referral Tracking Manager

Members returning home with a medical condition are given the option to return home and receive care with a Home of Record (HOR) referral. The Resource Referral Tracking Manager (RRTM) researches VA and civilian facilities to meet the needs of the patient and manage the HOR referrals.
